

SHASHWAT HOLKAR

B.Tech TY CSE Core Student

AI & ML Enthusiast | Problem Solver | Cloud & DevOps Learner

Gmail- shashwat25holkar@gmail.com | Github- Shashwat2506 | LinkedIn- shashwat2504 | 9039559778

EDUCATION

B. Tech in Computer Science & Engineering

CGPA: **9.52/10**

MIT World Peace University, Pune

July 2024 – May 2028

Relevant Coursework: DSA | OOPS | DAA | AI | ML | Cloud | DBMS | Computer Networks | SEM | Game Dev | Web Dev

EXPERIENCE

Operations Member – Cipathon 24-Hour National Hackathon | MIT-WPU

- Contributed to the successful execution of Cipathon, a 24-hour national-level hackathon organized for the first time at MIT-WPU under the guidance of Dr. Balaji Patil and the CSE faculty team.
- Managed on-ground operations, participant coordination, and issue resolution throughout the event.
- Collaborated with organizing committees and faculty members to ensure smooth event execution.
- Assisted with logistics, scheduling, and maintaining seamless event flow during the hackathon.

Production Team Member – UEFC & ISGL Sports Tournament

- Worked under the Production Department, supporting large-scale sports event execution.
- Assisted in stage management, event coordination, scheduling, and operational activities.
- Collaborated with cross-functional teams to ensure smooth coordination throughout the tournaments.

Code Nexus & Flea Market Initiatives | MIT-WPU

- Supported sponsorship outreach by identifying and connecting with organizations across multiple domains.
- Assisted in building partnerships with potential sponsors for technical and campus events.
- Coordinated with external vendors, participants, and stakeholders for the successful organization of the college Flea Market.
- Helped strengthen industry connections to improve event visibility and participation.

Sports Summit Volunteer

- Contacted colleges and educational institutions to encourage participation in the Sports Summit.
- Coordinated with team representatives regarding registrations, logistics, and event communication.
- Helped increase participation by onboarding teams from multiple institutions.

Social Media & Marketing Team Member – E-Cell, MIT-WPU

- Contributed to digital marketing campaigns and promotional activities for entrepreneurship-focused events.
- Assisted in audience engagement, social media outreach, and branding initiatives.
- Collaborated with team members to improve event visibility across multiple platforms.

Marketing & Outreach Co-Head

- Led marketing initiatives for major technical events and hackathons.
- Planned and executed promotional campaigns for flagship events including Smart India Hackathon (SIH) Vishwanova, Insignia etc.
- Coordinated with cross-functional teams to maximize student participation and outreach.
- Assisted in strategic planning and research for club activities and technical initiatives.

Head of Research Department

- Led the Research Department and coordinated research activities across the team.
- Guided members in conducting literature reviews, technical research, and documentation.
- Contributed to drafting research papers and technical publications with team members.
- Fostered collaboration and knowledge sharing within the research team.

TECHNICAL SKILLS

Programming Languages:	C, C++, Java, Python, JavaScript, SQL, Assembly language	
Core Computer Science:	DSA, OOP, DBMS, Computer Networks, Operating Systems	
Web Development:	HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, REST APIs, JWT Authentication, Responsive Web Design, Component-Based Architecture, API Integration, Authentication & Authorization, CRUD Applications, MVC Architecture, State Management, Server-Side Rendering (SSR), Static Site Generation (SSG)	
Databases:	MySQL, MongoDB, PostgreSQL	
AI / ML:	NumPy, Pandas, Machine Learning Fundamentals, Data Analysis, Data Preprocessing	
Hardware & Electronics:	Arduino, ESP32, ESP8266, Raspberry Pi, Embedded Systems, Microcontrollers, GSM/GPS Modules, RFID, IR Sensors, PCB Design Basics, Circuit Design, Communication Protocols (UART, I2C, SPI), GPS/GSM Modules	
Developer Tools:	Git, GitHub, VS Code, Cursor AI, Postman, Antigravity	
Cloud & Deployment:	AWS (EC2, S3, IAM, VPC, CloudWatch), Application Deployment, Linux Server Basics, Vercel, Render, GitHub Pages	
Leadership & Management:	Event Management, Marketing, Sponsorship Outreach, Communication	Research, Team Leadership,

VerSight –

AI Deepfake Detection Platform- AI | ML | Computer Vision

- Developed an AI-powered platform for detecting manipulated and AI-generated media.
- Implemented deepfake analysis workflows to identify authenticity indicators in uploaded content.
- Designed an intuitive web interface for users to upload and verify media files.
- Focused on improving digital trust and combating misinformation through automated detection.
- Live Demo: versight.vercel.app

Q-GPT –

AI-Powered Full-Stack Conversational Platform React.js | Node.js | Express.js | MongoDB | Gemini API | ImageKit | Vercel

- Built a full-stack AI SaaS platform featuring intelligent chat assistance using Gemini API and AI-powered image generation via ImageKit.
- Implemented secure JWT-based authentication, user registration/login system, and password hashing using bcrypt for enhanced security.
- Developed multi-chat conversation support with persistent chat history stored in MongoDB Atlas cloud database.
- Designed and integrated a credit-based usage system with transaction architecture to manage AI feature access.
- Created a community image sharing platform with cloud image storage using ImageKit for scalable media handling.
- Built a responsive, modern UI with dark mode support and seamless user experience across devices.
- Developed RESTful backend APIs using Express.js and deployed the full application on Vercel for high availability and performance.
- Live Demo: <https://q-gpt.vercel.app/>

Shashwat Portfolio –

Interactive Developer Portfolio Next.js | React.js | Tailwind CSS | Framer Motion | Vercel

- Designed and developed a modern personal portfolio showcasing projects, technical skills, achievements, and professional experience.
- Built using Next.js with file-based routing, optimized component rendering, and server-side capabilities for improved performance and SEO.
- Implemented responsive layouts using Tailwind CSS with utility-first styling and mobile-first design principles.
- Integrated Framer Motion to create smooth animations, transitions, and interactive UI elements for enhanced user engagement.
- Structured reusable React components and optimized state management for scalability and maintainability.
- Created a professional developer brand presence with integrated project showcases, GitHub links, and contact sections.
- Deployed the application on Vercel with production-grade performance, fast load times, and cross-device compatibility.
- Live Demo: <https://s-portfolio-beige.vercel.app/>

ScamGuard – AI-Powered Scam Detection Platform

AI | React.js | Cybersecurity

- Developed a security-focused platform to detect phishing websites, scam emails, suspicious messages, and fraudulent content.
- Integrated AI-based analysis to assist users in identifying potential online threats.
- Designed multiple scanning modules for URLs, emails, messages, and screenshots.
- Focused on enhancing digital safety through fast and accessible scam detection tools.
- Live Demo: scam-guard-2026.vercel.app

Emergency Routing System – Smart Route Optimization

React.js | Graph Theory | A* Algorithm

- Developed an interactive emergency dispatch simulation system for route optimization.
- Implemented the A* Search Algorithm to compute shortest and fastest paths between locations.
- Visualized graph nodes, weighted edges, emergency vehicles, and route selection in real time.
- Designed an intuitive dashboard for ambulance, police, fire truck, and emergency routing operations.
- Demonstrated practical applications of graph algorithms in emergency response systems.

Smart Radar Detection System

Arduino | Embedded Systems

- Developed a radar-inspired object detection system using Arduino and ultrasonic sensors.
- Implemented real-time distance measurement and object tracking within a defined scanning range.
- Integrated servo motor-based rotation to simulate radar sweeping functionality.
- Visualized detected objects and their positions through a graphical interface for real-time monitoring.
- Demonstrated practical applications of sensors, microcontrollers, and hardware-software integration.

ACHIEVEMENTS

- Participated in 8+ national and inter-college hackathons, collaborating on innovative software solutions and real-world problem statements.
- Successfully qualified through multiple evaluation rounds in 3+ competitive hackathons, demonstrating strong problem-solving, teamwork, and technical skills.
- Maintained an academic CGPA of 9.52/10 in B.Tech Computer Science & Engineering.
- Developed and deployed multiple full-stack, AI-powered, and algorithm-based projects including Deepfake Detection, ScamGuard, Q-GPT, Emergency Routing System, and Aura Glass.
- Actively contributed to the organization and execution of large-scale university events including Cipathon, Sports Summit, and Code Nexus.

CERTIFICATIONS

- Java Programming Certification – Completed an intensive 2–3 month training program covering Object-Oriented Programming, Data Structures, and Core Java concepts.
- Python Programming Certification – Completed a 2–3 month certification program covering Python fundamentals, problem-solving, file handling, and automation.
- Data Science with Python Certification – Gained hands-on experience in data analysis, visualization, NumPy, Pandas, and machine learning fundamentals.
- Web Development Certification – Completed comprehensive training covering HTML, CSS, JavaScript, React.js, responsive web design, and modern development practices.
- Git & GitHub Fundamentals – Version control, collaboration workflows, and repository management.
- Database Management Systems Training – SQL fundamentals, relational databases, normalization, and query optimization concepts.
- Artificial Intelligence & Machine Learning Fundamentals – Introduction to machine learning workflows, supervised learning, and practical AI applications.
